PORTFOLIO BRIEF / SELECTED WORK

Erdem Şahin

Data systems & workflow automation

Reporting systems and automated workflows for programme and operations teams.

01 / PROGRAMME MONITORING

Projects-on-Track

Power Apps / Microsoft Fabric / SQL / Power BI

Challenge	Country offices needed a consistent way to report project performance and flag delivery issues.
Contribution	I moved the pilot into operational use and built SQL pipelines that linked Power Apps data collection to Fabric Warehouse and Power BI.
Outcome	Programme teams gained a shared view of project status and indicators for follow-up.

02 / WORKFLOW AUTOMATION

Recruitment automation

Power Apps / Power Automate / SharePoint

Challenge	HR teams and interview panels coordinated assessments, documents and approvals through manual handoffs.
Contribution	I built an interview scoring application and automated reminders, approval notifications and document filing.
Outcome	Interviewers recorded assessments through a consistent workflow and HR teams could track progress in one place.

Reporting systems and automated workflows for programme and operations teams.

03 / KNOWLEDGE ACCESS

Teams Acronym Finder

Microsoft Teams / Power Virtual Agents / Power Apps

Challenge	Staff needed a quick way to look up organisational terms and keep definitions current.
Contribution	I built a glossary chatbot in Teams and a Power Apps workflow for colleagues to propose and maintain entries.
Outcome	Staff could look up definitions in Teams and contribute to keeping the glossary current.

04 / REPORTING

Total Reach Dashboard

Power BI / User guidance

Focus	Help colleagues use a Power BI dashboard for reach reporting.
Portfolio example	User guidance for navigating the report and working with its views.
